

Protocol 10 - June 18, 2020

1 Time and duration of the meeting

15:00-15:30

2 Attended Persons

Johanna, Luca, Niklas, Sebastian, Simon, Yasmin

3 Discussed Topics

- We figured out together how to work on the new deliverable, reading the script to understand what has to be done in the different stages, since there was no example this time
- We created a very short work plan
- We discussed how much time the steps in 'Instruction 4' takes, so we avoid working when we should be studying for exams

4 Conclusions

- We could not make a very detailed work plan, since we are still waiting on a feedback on the last deliverable, and since the next one is in large parts based on this one, we didn't want to build on incorrect diagrams.

5 New tasks assigned to each person

- Niklas - Talk to our advisor to get feedback for this deliverable via Slack
